MICROPTIC KILLER 2

Price

29,90 €

After the huge success of our first gaming mouse pad, the NOVA KILLER, sold to nearly 200 000 gamers, NOVA is really proud to announce the new release of this amazing product. New shape, new colors, KILLER has changed ! Welcome to KILLER-2.

Featuring NOVA's new colors and new logo, KILLER-II offers various new innovations developed especially for the gamers.

- New shape: With an awesome design, definitely more attractive, KILLER-2 features a new shape, more aggressive. Also, that shape will make it easier to stick the mouse pad on your desk thanks to the straight bottom edge.

- New colors: Matching the new NOVA identity, the new colors are really attractive. Black, red and white are the 3 main tendencies from now. The KILLER 2 will be available in three different color scales.

One of the main reason of NOVA KILLER success was the unique material developed by NOVA for this mouse pad. A bi-material structure with micro-mirrors spread out in the inner material. We decided to keep that major evolution on KILLER-2.Technical Sheet

- Size 337x307mm / 12.08x13.26"
- Thickness: 3mm / 0.11"

- Bi-material: That new pad keeps the NOVA unique material. The best ever made for the mouse gliding and the signal accuracy.

The inner material is now available in two colors, Black or White.

The outer material (centring frame) is now available in three colors, Red, Black or Silver, determined upon the product chosen.

- 8000 DPI, 0 Latency: This is one of NOVA's main commitments. 0 mouse delay, 0 loss of signal. Our 8000 DPI materials guarantee a perfect response of the mouse signal, Laser or Optical.

- Centring Frame – built of smoother by touch material bordered by a fillet, helps the intuitive mouse re-centering still keeping concentration on the game.

- Underside - non-skid base perfectly adheres to any desk surface thanks to micro-cellular foam layer.
